TUBE SIZE	WEIGHT	WALL THICKNESS
2½"	10.26 lbs ea.	0.135"
3"	12.30 lbs ea.	0.188"

For estimating purposes only.

DELINEATION & NO PASSING ZONE PENNANTS
As of June 2012, all projects PFR'd after that date will have continuous delineation no matter what the ADT is on that route unless the district does not want at PFR, at which time the district will have to document as to why they don't want continuous delineation. We will also be installing no passing zones pennants on additional routes that are not shown in the TEM. The listing of additional routes was determined thru the safety enhancement program and will be provided at a later date.
